

Character Profile – Prometheus

Role

Supporting Lead

Age

Appears mid-30s (Earth equivalent)

Species

Extraterrestrial

Physical Description

Prometheus possesses a tall, physically powerful build with the quiet confidence of an experienced leader. His movements are deliberate and controlled, revealing immense strength without unnecessary aggression. His calm presence often speaks louder than words.

Personality

Wise, patient, compassionate, and deeply philosophical, Prometheus has witnessed the rise and fall of civilizations over centuries. He values life above conflict and believes true strength comes from restraint. Unlike his impulsive younger sister, Ra, he carefully considers every action before committing to it. He is the only person capable of calming Ra when her emotions overwhelm her, and she ultimately trusts his judgment above anyone else's.

Background

Prometheus and his sister Ra originate from a distant world whose name has been lost to history. Their species can manipulate the elements surrounding them, shaping them into physical objects. On their homeworld this ability was limited to relatively simple creations such as blades, staffs, shields, and basic tools. Earth's atmosphere, however, contains a far richer and more complex mixture of elements because of natural chemistry and centuries of human pollution. Ironically, that complexity allows Prometheus and Ra to construct far more advanced and intricate objects while on Earth. This serves as one of the film's subtle themes: humanity's impact on the environment has unintentionally created new possibilities.

Abilities

- Manipulates surrounding elements to create physical objects.
- Can construct both simple and highly complex tools and equipment while on Earth.
- Controls plant life, growth, and regeneration.
- Generates powerful bio-electric EMP surges capable of disabling electronics.
- Rapid healing and exceptional endurance.
- Highly skilled in strategy and hand-to-hand combat.

Role in Story

Prometheus joins Masha's mission because he has watched other worlds lose their freedom to the same corruption. He refuses to let humanity suffer the same fate and becomes the team's moral compass throughout the story.
